

Combi Compact CCAT1

The "All Terrain" Combi-Compact

The "AT" series raises the standard of professional trolley systems to an exciting new level.

The CCAT (1) is our compact model but incorporating all the rugged AT features.

Two minutes to unfold and put it together, no tools required, superb strength, plenty of tray space and two 6-litre pails as standard.

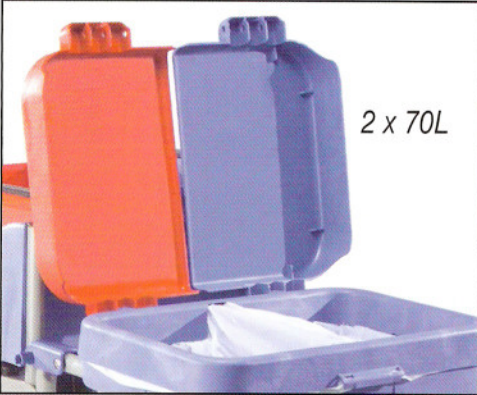

The big wheel Structofoam chassis is a masterpiece, allowing movement both inside and outside and even that has rotating buffers on every corner and its own brake system.

The CCAT1 uses our exclusive 2416 system with AWS (Automatic Water Separation) as standard, and has a choice of 5 mop specifications.

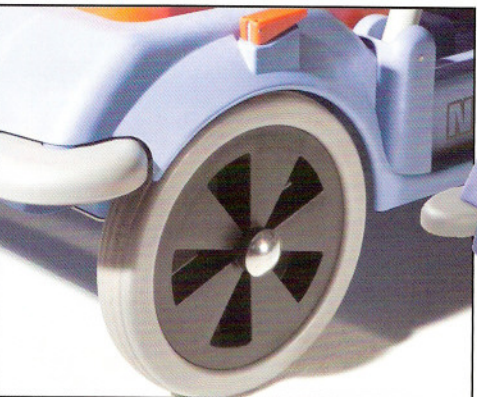

Also available in stainless steel

1 x 120L

2 x 70L

Shown with Kit JT2
